

the dimensions of the hall are 12ft high, 6ft wide, and 29 ft long.

to stay within the stipend budget, still have an impactful installation, and be able to install in under 3-4 hours, I decided on a concept that is one large hanging mobile archway to hang at the very start of the hallway near the front entrance.

materials: natural twine, 105 individual ceramic abstract shapes, strung from a bamboo rod suspended from ceiling

two longest strings will be 7.5 ft long and gradually get shorter towards the center

front entrance
